

GREAT Results Using A WETIT QDO to Post Dip

Automatically Post-Dipping every cow means a greater percentage of cows are post dipped and a reduction in total milking time per session. It may reduce labor required depending on current manpower in the parlor.

Great Improvement in Herd Health!

A WETIT QDO Automatic Post Dip Teat Sprayer was installed on a 930-cow dairy in April 2019 in the single return alley pictured above on the right.

In June 2019 The Dairy received its first Milk Quality Award ... it's somatic cell count is at an all-time low and holding, and clinicals are also at an all-time low!

A Reduction in Somatic Cell Counts!

Reduced cases of new mastitis and lower SCC have been seen on nearly all dairies that have installed WETIT Automatic Teat Spray Systems.

Consistency?

YES! The WETIT QDO consistently sprays the same volume of dip 2 or 3X daily extremely accurately, 365 days a year for the best possible coverage.

Conclusion: WETIT QDO Automatic Teat Sprayers typically show an acceptable return on investment with healthier herds being milked in less time per session, or more cows in the same time, by less stressed and happier operators.
